

Join us for the 2nd Sandbox Networking Event! "Smart, Wireless, & Still Secure" Hosted by PracticePoint at WPI on October 25th

Join MeHI and [PracticePoint at WPI](#) for the second event in our Mass Digital Health Sandbox Networking Series. These events bring together the dynamic Massachusetts digital health ecosystem to connect in-person and to showcase the amazing work of the R&D centers across the [Sandbox Network](#).

Each Networking event features a discussion on a topic of interest, as well as an opportunity to network. In honor of [Massachusetts Cybersecurity Month](#), the event on October 25th will focus on "**Smart, Wireless, & Still Secure: Considerations for Smart Medical Devices and Networks.**" The expert panel (listed below) will discuss the landscape of cybersecurity needs, considerations, and technologies

for smart medical devices, and explore how traditional computers may interact with medical devices, instruments, and people:

- *Moderator*: **John Petrozzelli**, Director, Mass Cyber Center at MassTech
- **Craig Shue**, Professor & Head of the Department of Computer Science, WPI
- **Ulkuhan Guler**, Associate Professor, Electrical & Computer Engineering, WPI;
- **Patrick Schaumont**, Professor, Electrical & Computer Engineering, WPI; &
- **Matt Weir**, Principal Cyber Security Researcher, MITRE

Guests will also be able to tour the cutting-edge PracticePoint facility as part of the session. Light refreshments and beverages will be served.

Wednesday, October 25th

5:00 pm - 7:30 pm

PracticePoint at WPI

50 Prescott Street (Gateway Park II)

Worcester, MA 01605
