Medical/Behavioral Health Emergency Response Plan for
Mass Academy of Math and Science
85 Prescott Street
Worcester MA 01605
1-508-831-5859
Director: Anne Ludes
aludes@wpi.edu
www.massacademy.org
Emergency response services
WPI Campus Police
508-831-5555

The Mass Academy of Math and Science is a public school of excellence for 100 academically accelerated 11th and 12th grade students in Massachusetts. We emphasize math and science within a comprehensive, interactive program. The rigor of junior year classes exceeds high school honors and AP, with more than 1100 hours of instruction. Seniors complete a year of college, enrolling in classes at Worcester Polytechnic Institute, a nationally ranked engineering school, thus making the Academy the only public school in Massachusetts whose students attend a private university full-time as seniors in high school. The Mass Academy of Math and Science serves two grade levels, who attend school on two campuses. The juniors are housed entirely in the building at 85 Prescott Street, Worcester, MA. The seniors are full time students at WPI and attend classes on the WPI campus. Emergency services are provided to Mass Academy of Math and Science by Worcester Polytechnic Institute’s EMS and Campus Police, which have clearly delineated protocols and procedures: https://www.wpi.edu/about/policies/emergency-management

The WPI Campus Emergency Guide is posted at the main entrance, in the Brickyard, and is at the Operation Manager’s phone station and the Director’s phone station.

Emergency Contact Information
(1) WPI Campus Police to activate EMS 1-508-831-5555 (from school phone 5555)
(2) Worcester Police Department 911 (from school phone 9-911)

In any crisis or emergency, WPI's foremost concern is for the protection of human life, health, and welfare. Protection of property and of the integrity and reputation of Mass Academy / WPI are also critical.

Mass Academy has developed this Medical/Behavioral Health Emergency Response Plan (Plan) in consultation with members of the school community, including Campus Police, the WPI Student Development and Counseling Center, and other community partners. The purpose of the Plan is:
• To reduce the incidence of life-threatening emergencies, and
• To promote efficient responses to such emergencies.

The complete Plan is posted on the school’s website, at the Operation Manager’s desk, and in the Director’s office. Protocols that include specific actions to take in case of a medical or behavioral health emergency have been posted in classrooms, and the Brickyard, and are provided to key staff. The complete Plan will be modified as needed and updated whenever there are physical changes to the school campus, including new construction. The Plan will be submitted to the Department of Elementary and Secondary Education every three years.

Safety Assessment
To prevent injuries and accidents on school property, Mass Academy follows Occupational Safety and Health Administration (OSHA) guidance. Additionally, Mass Academy works closely with WPI’s Director of Environmental Health and Safety and Emergency Preparedness Director to ensure all protocols and procedures promote a safe learning and working environment.

Community Emergency Responders
Mass Academy has an ongoing relationship with WPI’s Campus Police and Emergency Preparedness Director. WPI emergency response and preparedness personnel have connected our school with local emergency services and have assisted us with establishing rapid communication systems.

911 Access
The school has access to both 911 services and WPI Campus Police (5555 from any school phone). Emergency numbers are posted at every phone in the school. All Mass Academy faculty store the WPI Campus Police emergency number in their cell phones for use in an emergency that takes place outside of the 85 Prescott Street building.

Contact Information
The school maintains an updated list of all faculty and staff, with phone numbers for all classrooms and offices. The school utilizes a public announcement (PA) system through the school phones so that any school employee can notify the entire building of an incident in the event of an emergency. The code to activate the PA system is posted on the school phone list.

Mass Academy maintains a chain of command for response to an emergency. The chain of command will be called through the Operations Manager (who serves as the back-up to the Director). The chain of command is:
   a. Director
   b. Counselor
   c. Senior teacher in building

Mass Academy maintains an updated list of WPI and community-based providers of behavioral health professionals who can provide long- and short-term mental health services following
incidents and emergencies. This resource information is available through the Director and the school counselor along with information on the state’s Behavioral Health Help Line: https://www.masshelpline.com/.

Mass Academy’s operations manager will contact parents/guardians of students and emergency contact persons for faculty and staff if the student, faculty, or staff person has a medical/behavioral health emergency. The school maintains a list of names and phone numbers of parents/guardians, updated at the beginning of each school year, who should be contacted in case of a medical/behavioral health emergency concerning a student. The school maintains a list of names and phone numbers of individuals who should be contacted in case of a medical/behavioral health emergency concerning faculty and staff. Faculty and staff are directed to provide updated contact information as needed to the main office.

**Medical/Behavioral Health Emergency Response Protocols**

Mass Academy’s Medical/Behavioral Health Emergency Response Protocols are posted in the Director’s office, classrooms, and Brickyard with instructions on how to activate the local emergency medical services (EMS).

In case of a **medical** incident, school staff will immediately:

a. Contact the main office who will then notify the school nurse; and  

b. Escort an injured person who is ambulatory to the wellness office or notify the Director or school nurse if the person cannot be moved.

Main office personnel will ensure that designated individuals are directed to remain with the injured or ill person until medical assistance arrives.

The school’s medical response will proceed as follows:

The Director (or designee), in consultation with the school nurse when possible, will assess the condition of the person(s) to determine the category of injury, illness, or condition:

- **Life-threatening or potentially disabling**: Because these medical conditions can cause death or disability within minutes, they require immediate intervention, medical care, and, usually, hospitalization. Examples of this category include airway and breathing difficulties, cardiac arrest, chest pain, and/or cyanosis.

- **Serious or potentially life-threatening or potentially disabling**: Burns, major multiple fractures, and insect bites are examples of this category. These occurrences may result in a life-threatening situation or may produce permanent damage, so they must be treated as soon as possible.

- **Non-life-threatening**: These are defined as any injury or illness that may affect the general health of a person (e.g., mild or moderate fever, stomachache, headache, seizures, fractures, cuts). The faculty member will evaluate the incident and make decisions
regarding further treatment. The responsible party may notify the parent/guardian and recommend follow-up medical evaluation or treatment.

When an injury, illness, or condition is determined to be potentially life-threatening or disabling, the Director, in consultation with the school nurse if feasible, will inform designated personnel to:

- call Campus Police (5555) or EMS (911) and provide the location of the injured or ill person and available rescue equipment;
- direct designated school personnel to remain stationed at the specific location on campus where the medical incident occurred and meet emergency responders upon arrival, providing updates on the situation and the location of available rescue equipment. EMS response time to the school is estimated at less than 4 minutes, barring unforeseen delays;
- notify the parent/ legal guardian of the student or the emergency contact for faculty/ staff and inform him or her that the person is ill or has been injured and is being transported to a medical facility if the information is known at the time of the call.

In the event of any medical incident, personnel will notify the Director. The Director will assess the situation and instruct main office personnel to place the 5555/911 call in the event of a potentially life-threatening or potentially disabling injury, illness, or condition. Other steps will be taken as described above.

If the injury, illness, or condition is later determined by the school nurse or other trained personnel to be minor, the EMS call will be canceled, or EMS units will clear the scene.

If the Director, in consult with the school nurse whenever possible, determines that the injury, illness, or condition is non-life-threatening, first aid and or medical services will be provided onsite, as appropriate. Main office personnel will notify the involved student’s parent or guardian.

Off site, faculty carry cell phones for effective communication and the established chain of command is followed to determine who takes charge of a scene. The teacher directly in charge of the student stays with the injured student while other teacher(s) manage the class.

All staff will use standard precautions when administering any first aid. Standard Precautions are thorough hand-washing, gloving in the presence of body fluids, and proper disposal of contaminated wastes. The routine use of appropriate precautions by the caregiver regardless of knowledge of germs present in the individual’s blood, saliva, nasal discharges, vomit, urine, or feces prevents the transmission/spread of disease and protects the caregiver. When handling the discharges from another person’s body, always use these precautions. Use of Standard Precautions removes the need to know which persons are infected with which germs in the school setting.

Updated June 2023
All faculty and staff must adhere to the following during all medical incidents:

- Standard Precautions must be followed at all times (see Definitions).
- Avoid moving the ill or injured person, unless there is more danger if left there.
- Remain with the person until assistance arrives and remain calm.
- Direct other staff to manage bystanders.

In case of a behavioral incident, school staff will immediately:

- Contact the main office who will then notify the school counselor and Director; and
- Offer to escort the person to the counselor’s office or notify the school counselor if the person is unable or refusing to move.

Main office personnel will ensure that designated individuals are directed to remain with the person until additional behavioral health assistance arrives.

The school’s behavioral health response will proceed as follows:

- The school counselor will assess the condition of the person(s) to determine the category of behavioral need.
  
  i. **Life-threatening Situation (Emergent):** There are certain behavioral health conditions that can cause death or harm to self and others, they may require immediate intervention, medical care, and, usually, hospitalization. A behavioral emergency is defined as a situation in which a person presents as being at imminent risk of behaving in a way that could result in serious harm or death to self or others. Examples of this category include signs of suicidal self-injury, suicidal or irrational thoughts, and increased agitation demonstrated as verbal or physical threats. The director or school counselor may consider calling Mobile Crisis Intervention (Community Health Link) at 866-549-2142 or Campus Police at 5555.
  
  ii. **Serious or in need of immediate crisis intervention (Urgent):** Signs might include inability to perform daily tasks, rapid changes in personality, mood, or behavior, signs of alcohol or substance use, or significant withdrawal from friends, family members, or enjoyed activities.
  
  ii. **Non-life-threatening behavioral health need (Routine):** These are defined as any behavioral needs that may affect the general health of a person (e.g., mild or moderate feelings of anxiety, irritability, frustration, sadness, anger, etc.). The school counselor will talk with the person and discuss with the parent/guardian recommendations for further treatment, communicate with community providers, and make any necessary referrals. The school counselor may consider calling the Behavioral Health Help Line (BHHL) 833-773-2445 for additional support coordinating services.

- History of suicide attempts or other self-harming behaviors should be considered when determining level of need for intervention.
The BHHL can support the school counselor or others with the assessment and response to behavioral incidents as follows:

<table>
<thead>
<tr>
<th>Behavioral Incident</th>
<th>ROUTINE</th>
<th>URGENT</th>
<th>EMERGENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Criteria</td>
<td>When the person manifests an adequate pre-morbid level of functioning with adequate social/family supports and resources, and when the person demonstrates only mild impairment in judgment, functioning, and impulse control.</td>
<td>The person may be distressed, or multiple risk factors are present, but there is no current potential danger of harm to self or others. The person indicates a plan and ideation to harm self or others, but no apparent means or intent are present, and protective factors are sufficient to not warrant a higher risk rating. The person indicates intoxication or mild withdrawal symptoms.</td>
<td>Failure to obtain immediate care would place the person’s life, another’s life, or property in jeopardy, or cause serious impairment of bodily functions. If the person is determined to be at imminent risk, the school counselor will initiate the outreach to active rescue and request community dispatch and safety assessment.</td>
</tr>
<tr>
<td>Response (Examples)</td>
<td>Referral to community-based services, including outpatient and population specific services</td>
<td>Connecting to local Community Based Health Center or Behavioral Health Urgent Care</td>
<td>Deployment of Mobile Crisis Intervention/ (Community Health Link) at 866-549-2142 Or 5555/911</td>
</tr>
</tbody>
</table>

When in a **life-threatening situation**, the school counselor, in consultation with the Director whenever possible, will inform main office personnel to:

- call Campus Police (5555) or EMS (911) and provide the location of the person;
- alert the Director if not yet notified;
- direct designated school personnel to remain stationed at the specific location on campus where the behavioral incident occurred and greet emergency responders upon arrival, providing updates on the situation. EMS response time to the school is estimated at less than 4 minutes, barring unforeseen delays;
• the Director will decide if there should be a stay in place while emergency services are on the premises;
• notify the parent/guardian of the student or the emergency contact for faculty/staff and inform them that the person is experiencing a behavioral health emergency and is being transported to a medical facility if the information is known at the time of the call.

When an individual is in need of immediate crisis intervention, the school counselor, in consultation with the Director whenever possible, will inform main office personnel to:
• call Mobile Crisis Intervention (Community Health Link) at 866-549-2142 and provide the location of the person in need of immediate crisis support;
• alert the Director if not already notified;
• notify the parent/legal guardian of the student or the emergency contact for faculty/staff and inform them that the person is ill or has been injured and is being transported to a medical facility if the information is known at the time of the call;
• direct designated school personnel to remain stationed with the person identified as needing crisis intervention and be prepared to greet crisis responders. If school personnel experience unforeseen delays and behavioral symptoms worse, they can then direct the main office personnel to place the call to Campus Police (5555) or 911.

If the school counselor is not in the building at the time of the behavioral emergency, main office personnel will notify the Director. The Director will assess the situation and direct main office personnel to place the emergency call in the event of a potentially life-threatening situation. Other steps will be taken as described above.

If the behavioral condition is later determined by the school counselor or other trained personnel to be minor, the EMS call will be canceled, or EMS units will clear the scene.

If the school counselor determines that the behavioral condition is non-life-threatening, behavioral health services can be offered onsite. Main office personnel will notify the involved student's parent/guardian or the emergency contact for faculty/staff.

All faculty and staff must adhere to the following during all behavioral incidents:
• Standard Precautions must be always followed (see Definitions).
• Avoid moving the person unless there is more danger if left there.
  • Remain with the person until assistance arrives and remain calm.
  • Direct other staff to manage bystanders.

Faculty and staff who are involved in school-related activities outside of regular school hours have been trained in the medical and behavioral emergency response protocols.
Cardiopulmonary Resuscitation (CPR) and First Aid Training
All Mass Academy faculty members are trained every two years in Red Cross first aid and CPR.

Automated External Defibrillators (AEDs)
Mass Academy has one (1) fixed Automated External Defibrillator (AED), with additional AEDs available throughout the WPI campus. AED locations are listed in the WPI campus emergency guide. The Mass Academy AED is located on the wall at the end of the main hallway, at the bottom of the stairs. All Academy staff are trained in AED use as part of First Aid training every two years.

Medical and Behavioral Health Emergency Response Drills
The school conducts medical and behavioral health emergency response drills in coordination with school evacuation or fire drills. The principal or designee will ensure that the Plan is reviewed after each drill and revised, if necessary, based on evaluation results to improve response effectiveness.

Multi-Hazard Evacuation Plan
Mass Academy has established emergency shelter and evacuation procedures for fires, hurricanes and other hazardous storms or disasters in which bodily injury might occur, shootings and other terrorist activities, and bomb threats. These procedures are informed by and aligned with the WPI Emergency Management Plan and tailored to the specific configuration of our facility. All faculty and students will be registered with the WPI Alert system to receive emergency campus-wide alerts.

Mass Academy’s Crisis Response Team responds promptly and effectively in the case of a natural disaster or other emergency occurring on or affecting the Mass Academy / WPI campus and its community. The Crisis Response Team is made up of the Director, Operations Manager, and faculty members who work together to manage the crisis from beginning to end, making determinations about the scope and nature of the response as well as coordinating communications about the crisis to all internal and external constituencies. In many instances, the CRT includes the entire Mass Academy faculty and staff.

Mass Academy maintains a chain of command for response to an emergency. The chain of command will be called through the Operations Manager (who serves as the back-up to the Director). The chain of command is:
  a. Director
  b. Counselor
  c. Senior teacher in building

Purpose
The primary goals of the team are to:
• Protect life and property
• Ensure appropriate communication with internal (campus) and external (parents, media, and other) audiences
• Alleviate human suffering and hardship
• Maintain and restore essential facilities and services
• Ensure continuity of operations

Process
Mass Academy/WPI's Crisis Response Team is assembled whenever a natural disaster or other emergency threatens lives and/or property or the continuation of business at Mass Academy. Each incident has its own set of considerations that demand an appropriate and specific response. The CRT works with operating strategies outlined in WPI’s Emergency Preparedness Manual. While managing a crisis, the CRT strives to disseminate information that is both accurate and timely to the internal community and to external constituencies, including local emergency personnel and the media. After a reasonable interval following the crisis, the CRT holds a formal debriefing to assess the outcome and response to the event and makes recommendations, if necessary, to improve its response in the future.

Ongoing Training
To ensure Mass Academy/WPI's crisis management protocol is thorough and each member of the team understands their role in an emergency, the faculty holds non-crisis meetings for scenario planning.

Examples of Crises
A crisis response situation is a critical incident or situation which poses a serious threat to the health, safety, or welfare of the students, faculty, staff, or administration of Mass Academy / WPI or involves serious damage to the Academy’s facilities, property, or equipment. Some crises are not of a catastrophic nature, such as a limited crisis (one that can be handled by a department, such as a plumbing failure), a controversial crisis (one that involves a hate crime or a sexual assault/crime), or a safety crisis (such as a rash of car break-ins, non-life-threatening health matters, criminal actions reported on or near campus). The internal community will be advised as needed about such crises through e-mailed safety alerts and/or other direct communication.

While it is difficult to anticipate all possible emergency situations or types of crises, the following examples represent categories of crises that could necessitate the deployment of the Crisis Response Team:
• Student or faculty death
• Disruptive behavior (serious classroom disturbance including the threat of violence, active intruder, riot, hostage situation, bomb threat, faculty arrest)
• Major fire
• Building or other serious facility catastrophe
• Natural disaster (tornado, hurricane, flood, blizzard, ice storm)
**Timely and Accurate Communications**

The Director serves as the primary communications resource both to the internal community and as the official Mass Academy spokesperson. Regular updates and information are disseminated both to the internal community and to the media, but only when that information is accurate.

The goals of effective crisis communications are to:
- Identify constituencies who should be informed
- Communicate facts about the crisis
- Minimize rumors
- Restore order and confidence

WPI will be consulted before information is released to the media.

**Emergency Evacuation**

Protocols for safe entrance and exit from the school building are outlined for each specific type of situation in the [WPI Emergency Management Protocols](#). All students, employees, and guests should follow the posted instructions in the event of an emergency evacuation.

**School Discipline**

The Director and faculty will supervise students to the best of their ability to ensure a safe and orderly environment during a crisis. Inappropriate behaviors will be addressed with individual students after the crisis has passed.

**State of Emergency**

Should Mass Academy be operating under a state of emergency, timely information and instructions will be sent utilizing [WPI ALERT](#).

Faculty members will carry cell phones, linking them with all parts of the school campus, including outdoor facilities, to the emergency medical services system and protocols to clarify when the emergency medical services system and other emergency contact people shall be called. The chain of command described above will be utilized in the event of an emergency.

Below is a determination of emergency medical service response time to any location on the WPI campus;
- a. from EMS to any campus point is under 4 minutes
- b. four major hospitals are located in a 2 mile radius to campus
- c. fire station located one half mile from Mass Academy
- d. WPI campus police station located 3 blocks from Mass Academy

Below are safety precautions to prevent injuries in classrooms and on the facilities.

**At WPI and in the surrounding area:**
The WPI University Police suggests the following safety precautions for faculty, staff and students:

- Utilize the SNAP (Student Night Assistance Patrol) and Campus Police Safety Escort Service by contacting WPI Police: +1-508-831-5433.
- Be observant of your surroundings, including being aware of others around you.
- Walk in groups if at all possible and stay in well-lit areas.
- If you find yourself approached by one or more individuals, do not resist when it comes to giving up your property. Give assailants what they want and let them leave ASAP. Remember cash and personal goods can be replaced.
- Since the WPI campus is surrounded by major traffic thoroughfares, use caution when crossing the street. Always use crosswalks and obey crosswalk signals.
- Exercise caution and discretion when posting personal information (e.g. phone numbers, room number or address) on social networking websites like Facebook. You never know who is viewing your personal information and for what purposes.
- Always lock the doors and take the keys when you leave the car, even if you'll be gone for "just a minute."
- Use the busier, better-lighted stops on public transit, especially if you don't know the area.
- Don't leave valuables in view in the car, lock them in the trunk.
- Carry only credit cards you use on a regular basis. Never carry your social security card, birth certificate, or passport unless necessary.
- Shred all discarded documents, including bank statements, pre-approved credit card offers, insurance forms, and other documents that contain financial information.
- Make note ahead of time of the locations of emergency phones "blue lights" on campus.
- Report all crimes to WPI Campus Police as soon as possible at +1-508-831-5555.
- Be aware of the location of strategically placed emergency phones on campus
District AED Report

The district is to provide the following information when submitting the Plan.

The law requires each school district to report on:

- the availability of automated external defibrillators (AEDs) in each school;
  - AED device is readily accessible in a central location of Mass Academy
  - Campus AED’s are listed in the Campus Emergency Guide
- the total number of AEDs in each school
  - (1) Mass Academy plus (18) WPI.
    - In addition, Campus Police vehicles are equipped with AEDs.
- the location of each AED within a school; Central location at bottom of stairs (Mass Academy)
  - WPI (see addendum), 4 portables (1 ROTC, 3 athletics)
- whether the AED is in a fixed location or is portable;
  - (14 fixed location, 4 portable, not including Campus Police vehicles)
- a list of personnel or volunteers who are trained in the AED use
  - all Mass Academy staff trained
- a list of personnel who have access to AEDs during regular school hours and after school
  - the AED is in an open public access area for emergency use
- the total estimated number of AEDs necessary to ensure campus-wide access during school hours and in after-school activities and public events
  - 1-Mass Academy

Related Requirements: Response Sequence Practice and Periodic Review of the Plan

The Medical Emergency law requires schools to:

- practice the response sequence to a medical emergency at the beginning of each school year and periodically throughout the school year;
- evaluate and modify the Plan as needed; and
- update the Plan in case of new construction or physical changes to the school campus.
DEFINITIONS

The following definitions are from the Massachusetts School Health Manual and other sources.

**Automated External Defibrillator (AED)**
An Automated External Defibrillator is a lifesaving device to treat victims of sudden cardiac arrest. The defibrillator is designed to quickly and easily provide an electric shock that restores the victim's normal heart rhythm.

**Behavioral Health Emergency**
A behavioral health emergency is defined as an emergent situation when an individual is in need of an assessment and/or treatment in a safe and therapeutic setting.

**First Aid**
First aid is the immediate and temporary care given to an injured or ill person.

**National Institute for Occupational Safety and Health (NIOSH)**
The National Institute for Occupational Safety and Health is the federal agency responsible for conducting research and making recommendations for the prevention of work-related injury and illness.

**Occupational Safety and Health Administration (OSHA)**
The Occupational Safety and Health Administration set and enforces protective workplace safety and health standards.

**Standard Precautions**
Standard Precautions are the routine use of appropriate precautions by the caregiver regardless of knowledge of germs present in the individual’s blood, saliva, nasal discharges, vomit, urine, or feces. They include thorough handwashing, gloving in the presence of body fluids, and proper disposal of contaminated wastes. Standard Precautions prevent the transmission/spread of disease and protects the caregiver.
Important Phone Numbers

Police
- WPI Campus Police (emergency): +1-508-831-5555
- WPI Campus Police (routine): +1-508-831-5433

Addendum

AED On-Campus Locations

- 37 Institute Road – ROTC Maintains 1 AED for use at Events
- 37 Lee Street - 1st floor Main Lobby
- 60 Prescott Street - 1st floor Main Lobby
- 85 Prescott Street - Mass Academy Main Lobby, and 2nd Floor Main Entrance South
- Campus Center - 2nd Floor Main Entrance South
- Campus Police Vehicles are also equipped with AED’s
- Foisie Innovation Studio - 1st Floor Main Entrance East
- Founders Hall - Basement Campus Police Hallway
- Gordon Library - 2nd Floor Main Lobby North
- Harrington Gymnasium - Basement Locker Room Hallway
- Health Services - Main Entrance Hallway
- Sports & Recreation Center - 1st Floor Pool Deck, 1st Floor Squash Courts, 3rd Floor (Quad Level), Main Entrance, and Athletic Trainers office maintains 3 for use at Athletic Events
- Washburn Shops - 1st Floor Main Lobby
