

Summer Math Homework for Students Entering 3rd/4th Grade

Assumption of the Blessed Virgin Mary School is using IXL to provide practice and reinforcement of math concepts throughout the summer. This program allows us to differentiate instruction to help kids learn at their own level. Students will be assigned problems by their current math teacher in order to work on problems that are most beneficial to them.

Getting Started:

1. Go to [ixl.com](https://www.ixl.com) and sign in with the username and password provided by your teacher.
2. Under the “**Learning Tab**” is “**Recommendations.**” Click on “**Skills suggested by your teacher.**”
3. Please feel free to challenge yourself to reach a Smart Score above 80.

Enjoy your summer and keep that math brain fresh!
