

Dear parents and students,

This summer, students will be required to log into www.ixl.com to complete their summer math assignments. Once logged in, go to the Learning tab, then click on Skill Plans, scroll down and choose IXL Summer Boost: Math. From there click on the grade you are entering in the fall and it will take you to a list of all the specific skills you need to complete. You can also click on the link embedded within the PDF for your grade from the school's website. You must complete all of the skills with a Smart Score of 80 or higher. This IXL work is to be treated like any other school assignment. You will be graded on completion of the skills and this assignment will count towards your first trimester grade in math.

Good luck,
Mr. Suriano
